This section is broken into two. The first is the original vote, which was discarded due to confusion regarding voting procedures that had us requiring 8 of 9 present voters to affirm a platform in order for it to pass. This is an unreasonable standard and did not adhere to our governing documents. The first vote has been adjusted to account for the clarification.

As this is the only platform whose status would be changed by the clarification, a second vote was held via email to give Board members another opportunity to consider the platform
