Economic Development: Investing in Missouri

- UM generated $3.0 billion in total revenues in 2015.
- With more than 31,000 employees in the state, UM was 0 L V V R X U ODUJHVW employer in 2013.
- UM was issued 53 U.S. patents and filed 83 new U.S. patent applications in 2014.
- Four business startups were created around UM technologies in 2014 and the university earned $10.8 million in licensing income.
- UM received 176 new invention disclosures in 2014.

NEW DECISION ITEM REQUEST

UNRESTRICTED EDUCATIONAL AND GENERAL
FORM 5

Department: Higher Education-Unrestricted
Level 2 University of Missouri-Other Programs
Level 3 University of Missouri Kansas City
Decision Item Name: UMKC/MSSU Dental School Expansion: $1,500,000
Decision Item Rank: 3 of 4

I. PURPOSE AND CRITERIA FOR INCLUSION IN REQUEST

This request is for state general revenue funds to provide access to oral health care by increasing the health care professionals graduating from the University. There is both a regional and national need to improve access to oral health services. Oral health is an important part of general health. The Surgeon General has stated that you cannot have health without oral health. The State of Missouri ranks 4th lowest, nationally, in terms of percentage of population in Health Professions Shortage Areas (HPSAs). The Department of Health estimates that 286 dentists are needed to meet the needs of residents and remove the dental HPSAs in Missouri. Oral Health service access and utilization is challenging in rural areas of southern Missouri, where in Pemiscot and Ripley counties, among others, there is a very high population to dentist ratio. This initiative brings the collective expertise of two of Missouri's public universities together, University of Missouri Kansas City (UMKC) with Missouri Southern State University (MSSU), to address the need in Missouri. UMKC School of Dentistry is the state's only public dental school and MSSU has an outstanding dental hygiene program.

II. DESCRIPTION

The University of Missouri-Kansas City's proposed partnership with Missouri Southern State University (MSSU) in Joplin can address the need to provide additional oral health care providers to the region. According to a recent feasibility study, the location of a Satellite Program of the DDS program of UMKC in Joplin could provide an additional 15 dentists per year for the region. By drawing students from the contiguous rural region, a regional approach to educating local students to return to the communities of need can be achieved. UMKC's School of Dentistry has a long history of addressing oral health needs in the community and region. Each year, more than $500,000 in uncompensated care is donated back to the community in the region. Students in the program provide care in 26 community health centers as a part of the curriculum, improving oral health and solidifying the concept of giving back to the community for our students. The impact on the region (NOAIOP Economic Development Numbers) are as follows: out7( )-12(N)5(u)12(0(y)12(o)-1)-12)polnei7( )-12l7(15 de
